I'd get blown away  
the day we unboxed the bulb.  
  
To imagine - one hundred Watts  
  
of electricity  
  
beating like a pulsar!  
  
Or,  
  
the etching of your life  
  
along the heart rate monitor,  
  
undulating through  
  
the tungsten filament  
  
between two parallel contact wires.  
  
A touch of heat enough  
  
to tattoo my print to the globe of glass.
