

PROBLEM 8

You feel very drowsy, waking up in an unknown and empty city. It is late in the evening, and cold. What happened?

- (A) The time-machine has left you here.
- (B) Prior to this event, you looked at a hypnotic spiral that makes everything damn disoriented, and out of place.
- (C) You secretly went to the AOUR Laboratory where you drank some of the 'Soursop-chimarracao' liquor. You found this prototype on the desk of an eminent theoretical physicist.
- (D) Prior to this event, you attended a rehearsal performance of the 'Porta-radio Ferguson' instrument.
- (E) You spent last night partying in space to celebrate the 200th anniversary of the Schrödinger's cat thought experiment – what a night it was. Meanwhile the earth moved away from the sun. You come back to earth, it is cold, everyone stays indoors.
- (F) You are playing a virtual reality game console in which you can select the backdrop and location.

CREATIVE WORK INCORPORATING TEXT

#6 — Free

this is how time passes;
 the location that I used to walk past and often think of you,
 I now pass and remember that there I used to think of you
